WE celebrate the opening of our new store by offering a most complete list of bulbs for fall planting. Never before have we offered such a tempting list of Hardy Narcissus as you will find priced on the reverse side of this sheet. Plant now a border of this delightful flower.

Visit Our New Store...

436 South Fifth Street

The location of our old store has been purchased by the Water Company. The building is to be torn down. Our new store is centrally located for your convenience.

WORDS are not adequate to describe the startling splendor of tulips in full bloom. With tulips the amateur can enjoy masses of color, for they are of the easiest culture. You may have the annual pleasure of magnificent bloom with a small outlay of money and effort. Prepare the soil to a depth of 3 or 9 inches after applying a cupful of Bone Meal to each square yard. They require no winter protection. By planting the earliest tulips, Cottages, Darwins, and Breeders, you may have a succession of blooms lasting two months or more. Send us your order today, or better still, visit our new store and make your selections.

TULIPS

A new class of Tulips with great growth, large flowers, in a wide range of colors. Most popular for growing in bowls filled with gravel or peat moss. For the Rockery and Hardy Plant Border.

Bulbs should be planted in well-prepared soil to which humus and bone meal have been added. Very popular salmon pink. Finebedder. . .65 4.->0

DURAWIN DARWIN

Clara Butt. 

Large carmine-rose.60 4.50

Popular silvery lavender.60 4.7.>

Grenadier. Salmon orange of elegant form on tall flowering group, but possess weird and fantastic coloring on large, curiously-feathered petals. Sometimes called "Dragon Tulips." They belong to the May flowering group, but differ from other Tulips in that they are marked by robust growth, large flowers, and somber pastel shades. Culture is the same as that given most common varieties. All colors.

In the preparation of soil for acid-loving plants such as Azaleas, thefollowing will prove of great service. It placed in a sunny window, they will bloom without soil or water, and if the withered flowers are removed, will produce a succession of bloom. It will flourish in the spring. Where quick growth is desired, it will be considerably hastened by the addition of cuttings to the potting soil.

We will supply one each of Festiva Maxima, white; Karl Schumacher, red; and帝皇 (Empress), yellow. Each Doz. 100

At 436 South Fifth Street, Louisville, Ky.
